

FastAPI

FastAPI is a modern Python web framework.

Features:

- High performance
- Automatic Swagger documentation
- Pydantic validation
- Async support

LangChain

LangChain helps developers build LLM applications.

Components:

- Prompts
- Chains
- Memory
- Retrievers
- Agents

RAG

Retrieval Augmented Generation combines:

1. Retrieval
2. Context Injection
3. LLM Generation

Enterprise RAG systems use:

- Chunking
- Embeddings
- Vector Databases
- Reranking
- Citations
